eProphet
Payroll

eProphet Payroll is the most advanced payroll software solution tailor available for the QSR industry, comprehensively handling all your payroll requirements and delivering the right payments every time.

Advanced Calculation Engine

eProphet Payroll represents the pinnacle of modern labour award and payment processing; producing the most accurate payroll calculations possible and giving you the confidence your staff are being paid precisely as stipulated by the agreement they are employed under.

Compliance

eProphet Payroll helps safeguard you from potential litigation by delivering accurate payments, thorough audit trails and comprehensive financial reporting. Have confidence your payroll solution will stand up to scrutiny and help avoid heavy regulatory fines.

Feature Rich

eProphet Payroll offers unprecedented flexibility and options in how to process your payroll including full support for both salaried and wage earning employees; fixed, one off and percentage based deductions and allowances; superannuation/pension contribution calculation and payments; student educational loan deduction schemes; annual/sick/TOIL/long service leave accrual; variation on rates of pay for employee meetings and special events and much more.

Adaptable

Payroll runs are adaptable to change. Rate of pay switches, tax rate changes, employee birthdays and other factors are all automatically factored into calculations, pay split between periods is accurately accrued in your P&L, 24 hour store clockings that are bisected by a pay run are handled correctly without any need to split shifts in two, shifts can be assigned to another store for invoicing later, manual payments such as back pay can be easily and accurately calculated and final adjustments and overrides can be made to any payslip and that's just the start of it.

Timeclock to Payroll, Simplified

eProphet Payroll allows you to easily transfer timeclock data from the store via Abcom Cloud Services. Received clockings can be reviewed in a clear and easy to use visual clocking review, where shifts are colour coded according to the payment types incurred by that shift allowing you to very quickly identify any issues. If eProphet Scheduling is used at the store, scheduled shift times are also shown, making it easy to see variations there from.

Centralised Updating

Common payment awards, agreements and industry standard tax rates are automatically maintained and updated by Abcom Cloud Services. Custom awards can be easily configured and shared between sites at a chain wide, territory or business/franchisee level, pushed to eProphet Payroll and down to the eProphet Labour system at the store - achieving consistency between all sites.

Streamlined Rules

eProphet Payroll can automatically create a payment file for your payroll run that can be used to execute bulk account payments with your nominated bank. Payments for each employee may be apportioned across one or more bank accounts as per their needs and payslips can be emailed to save you time and printing costs.

Training Development

Traineeship schemes are fully supported by eProphet Payroll, simplifying the task of collating data for government rebates. Employees can be automatically configured to change to another award or payment category at specific dates in the future in support of training paths and employee service anniversaries are highlighted each pay run.

Suite Integration

Store clockings, rostered shift times, notes from the store are easily transferred by Abcom Cloud Services at the start of the pay period processing, employee data and award information is then sent back to the store in return. After a pay run is completed, payroll financial totals are automatically posted to the eProphet General Ledger system to completely eliminate double entry of labour costs into separated accounting.

Robust Technology

All eProphet systems are built using the highly acclaimed Microsoft® .NET® framework. The Microsoft® development platform is mature, robust and offers a massive range of advanced components and cutting edge functionality. In addition, adherence to strict Windows® development guidelines ensures that Abcom products offer long, productive life spans; representing a low risk, long term, quality software investment for your business.

Flexible Currency & Language

eProphet Payroll can be configured to handle any currency, language, banking providers and payment awards/tax configurations to meet the needs of the business operation in any country.

Detailed Employee Records

The employee masterfile tracks all aspects of your staff, their payment history, accruals and personal information. Common operations such as new hires, employee transfers and terminations are simple to perform and the latest employee additions and changes can be easily sent back down to the store by the click of a button using Abcom Cloud Services.

Business Reporting

A comprehensive range of detailed reports are available that capture key totals and indicators; affording you important insight into your metrics by any date, period or year. Easily review your labour efficiency against your store sales, zeroing in on performance by department or age category with additional tracking options set by you.

Intuituve User Workflow

Core eProphet functions are always mapped into user guided workflows that help the user perform tasks correctly and completely. Our simple interfaces allow you to reduce ramp up time of store managers on system operations.

Security & Confidentiality

Abcom systems are built with strong security for your peace of mind. All interaction with the system is restricted and logged by user account, configured however you so require. Additionally, all databases, data backups and data transmissions are 128bit encrypted to prevent unauthorised access from the outside.

eProphet Payroll is the most advanced employee payment calculation engine available on the QSR market. Have confidence that your business is paying your staff accurately no matter how complex the payment agreement.

eProphet Admin Suite
Payroll – General Ledger – Accounts Payable

eProphet Payroll is part of the eProphet Admin Suite – a comprehensive end-to-end QSR management solution that includes all the key business facilities you need to operate your restaurant operation.
